12/27/83*15 December 1983
ODP 83-1801**MEMORANDUM FOR:** Deputy Director for Administration**FROM:**[redacted]
Director of Data Processing**SUBJECT:** ODP Report for Week Ending 16 December 1983**1. Automated Information Management (AIM) System**

Members of ODP's Systems Programming Division (SPD) briefed the Chief, Special Security Center, Office of Security, on the protection of documents provided by the AIM System and, in particular, the codeword facility within that System. Discussions centered around the certification of SCI access approvals held by AIM users. It was agreed that these approvals would be periodically extracted from the Community-wide Computer Assisted Compartmentation Control System (FOURCEE) and then inserted into the AIM User Directory. SPD will develop the software to accommodate these procedures.

The AIM System on VM1 was modified and enhanced to provide better response. This was accomplished in such a way as to minimize the impact on our VM1 users. Response was immediately improved, and feedback from the users has been positive.

2. External Procurement Requests

ODP concurred as per [redacted] on the following external procurement requests for ADP equipment:

DDS&T/NPIC Acquisition of a Wang VS100 System and nine Wang personal computers for use by

SECRET

SECRET

3. COMIREX Automated Management System (CAMS)

25X1 IBM installed the new 3081 Processor, a large mainframe computer, in the [] Computer Center for the CAMS2 System on 10-11 December.

4. SAFE

Certain features of the Defense Intelligence Agency (DIA) SAFE System were made available to DIA users over the weekend of 10-11 December. This special availability was requested by DIA due to the Middle East situation.

5. Significant Events During Coming Weeks

25X1 None.

Excerpts from ODP Div/Staff Reports for Week Ending 16 December 1983Administrative StaffPersonnel:

25X1 [redacted] IMS,
 25X1 reassigned to OD on 12 December. [redacted]
 25X1 [redacted] OIS, reassigned to OD on
 25X1 12 December. [redacted]
 25X1 [redacted] Co-op, returned to ED on
 25X1 12 December. [redacted]
 25X1 [redacted] EOD'd for SDD on 12 December. [redacted]
 25X1 [redacted] Co-op for SPD, and Mr. William
 25X1 [redacted] Co-op for SDD, returned to school on 16 December.
 25X1 [redacted]

Consulting and Assistance Group

Quarterly Security Automated Name Check Activity (SANCA) processing was found to be incorrect. The problem, which is believed to be in the update cycle, has been turned over to the programmer. Further quarterly processing will be postponed until the customer moves to Stafford Building. [redacted]

Central Badging (CENBAD) Biweekly was completed late due to data problems. A bad record on the data base had to be identified and removed before processing could continue.

25X1 [redacted]

On 9 December, SAB and ISB split AIM on VM1 to improve the AIM response time on VM1. All non-ODP DDA AIM users (601) were moved to a separate AIM System running on VM1. This split was costly because it required that we give up two 3380 user packs to build the second VM1 AIM System. [redacted]

The first running of the CAMS2 Data Base Management Specialist Course was conducted by TRW at C of C during the week of 5 December. In attendance from DBMB were: Joseph

CONFID [redacted]

CONFIDENTIAL

25X1 The Trouble Desk handled a total of 925 phone calls for the week of 5-9 December: 600 incoming, 325 outgoing calls, and 135 Wang calls. Of the incoming calls, 153 reported terminal problems. [redacted]

25X1 New procedures for coordinating the installation, testing, and user training of Xerox 2700 Printers are being initiated by CSB in coordination with SPD and ED personnel. In these procedures CSB will act as the focal point for tracking the progress of these Xerox 2700 activities and for user interface. [redacted]

25X1 The AIM/Word Processor Reference Manual has been revised to include all user comments, and was submitted to the Printing and Photography Division, OL, for reproduction and dissemination. [redacted]

Personnel:

25X1 [redacted] joined the DCB on 12 December. She is
25X1 located at 510 Key. [redacted]

Intelligence Systems Group

No weekly report submitted due to the PDR conducted for SAFE, Delivery 3, from 12-16 December.

Management Information Systems Group

25X1 The installation of a new minicomputer in [redacted] to support OP Project CAPER will not be completed on schedule. Renovation of the minicomputer room (3N08) is behind schedule thereby delaying the minicomputer installation. OP has been
25X1 advised of the change in schedule. [redacted]

25X1 [redacted] attended a meeting with representatives from Price Waterhouse. They are developing a payroll system for the Department of the Army using structured analysis techniques and are ready to begin
25X1 detail design. The meeting was arranged by [redacted] and was
25X1 very informative. [redacted]

25X1 Preliminary meeting was held with the Compensation Division, OF, on 8 December to review a draft proposal for delivering the T&A process by December 1984. Several CD/OF concerns were identified and are being researched for further consideration in a subsequent meeting scheduled for next week.
[redacted]

CONFIDENTIAL

The LIMS development contractor (Booz, Allen & Hamilton) presented their proposed approach to implementing a LIMS Basic Operating Capability (BOC). The presentation included a statement of requirements satisfied at BOC, an operational process flow depicting electronic transmission of requisitions, and representative menus. BA&H was asked to prepare a similar briefing for the LIMS Steering Committee. [redacted]

Personnel:

[redacted] (CTEC) is assisting the CAMS QA effort for three days.

[redacted] EOD'd as the LSD secretary. Her new address and extension are 2B07 [redacted]

[redacted] left LSD to join ISD. His new address and extension are 2E21 [redacted]

A briefing for the LIMS Steering Committee is scheduled for 21 December in room 2C19 [redacted] at 0930.

Management Staff

1985 Congressional Budget Submission. Our 1985 Congressional Budget was submitted on 8 December. The first draft of the ADP services write-up for the CBTB has been prepared by the Comptroller's Office from our submission.

Finance. As of 14 December, there were 61 outstanding advances with a dollar value of \$28,880. Currently the delinquent advances total \$3,260. [redacted]

Processing Services Group

SPD completed software for the binary synchronous telecommunications link between the P&PD Dicomed film recorder and the Ruffing Computer Center on 9 December. Combined with a new TELEGRAF device interface, this link will provide high quality color slides, VUGRAFs and other film output for general users beginning early next year. [redacted]

Release 3 of CP replaced release 1 of CP last week on VM1 and VM2. This was a major change to the VM Operating System, but the first week of production was quite stable and completed with no major unresolved problems. There was only one problem, which involved function keys, reported by our users, but otherwise this major software change to the operating system went basically unnoticed by our large user community in the Ruffing Computer Center. [redacted]

Special Systems Group

25X1 C/SSG met with [] (Chief, Improved NPIC System),
to discuss procedures for defining and controlling the
interface between INS and the CAMS2 P/S. A method was devised
whereby each segment will appoint a single point of contact who
can commit his respective segment to comply with an agreed to
specification or change to the interface. In this manner, both
segments will be designing and implementing the same
capabilities and will not waste resources incorporating
25X1 uncoordinated changes. []

25X1 The major focus within the CAMS Project is on Integration
Test. Of the 129 test cases, 70 have been completed
successfully. For the month of November, 20 of the scheduled
39 cases were successfully completed. The Integration Test
activity is scheduled for completion on 15 January 1984.
[]

25X1 The CAMS2 P/S Interface Control Documents (ICDs) for
AIRES, SAFS, and NPIC have been converted from VM/SCRIPT files
to Wang word processor files. The ICDs were converted in
preparation to begin Phase III Requirements Documentation. The
documentation will be prepared and maintained by the CAMS2 P/S
Systems Integration Contractor, Synectics Corporation. The
VM/SCRIPT to Wang conversion effort was accomplished by
ODP/Consulting Services Staff. This was a large and complex
task that was completed in a most accurate and timely manner.
